

BRET LEWIS
DIRECTOR OF FULTON INNOVATION

Since 2007, Bret Lewis has been the Director of Fulton Innovation responsible for overseeing all operational aspects of the organization and providing value-driven strategic direction for the Fulton Innovation team.

Having successfully owned and operated seven different companies in diverse industries including component manufacturing, specialized equipment and real estate investments since 1993, Mr. Lewis brings unique insights, leadership and a strong entrepreneurial background to the team. Prior to his entrepreneurial endeavors, Mr. Lewis held senior executive positions in finance, sales and marketing at a number of public and privately held companies.

DAVID W BAARMAN
DIRECTOR OF ADVANCED TECHNOLOGIES

David Baarman is the Director of Advanced Technologies at Fulton Innovation and the lead inventor of eCoupled™ intelligent wireless power technology. Mr. Baarman is responsible for the technical supervision and development of eCoupled technology and other Fulton Innovation technologies.

Mr. Baarman joined Amway in 1997, where he first pioneered the use of intelligent inductive coupling in the eSpring™ Water Purifier. With over 20 years of leadership experience in the development of consumer and industrial products, Mr. Baarman took the technology behind eSpring and developed it to power everyday technologies, including consumer electronics, with a diverse range of power needs.

Mr. Baarman's efforts have led to national and global recognition of eCoupled technology and the acquisition of former competitor, Splashpower, in May 2008. Mr. Baarman has more than 450 U.S. and foreign patents that are granted or pending.

FRED KNOTT
DIRECTOR OF TECHNOLOGY LICENSING AND COMMERCIALIZATION

Fred Knott is the Director of Licensing and Commercialization for Fulton Innovation. He is responsible for driving the adoption of Fulton Innovation technologies through negotiated partnerships with leading companies.

Mr. Knott possesses a wealth of expertise in IT technology licensing, intellectual property rights negotiations, contract management, contract compliance, vendor management, high-tech acquisition and procurement operations.

Prior to joining Fulton Innovation, Mr. Knott served as Manager of Strategic Procurement for Amway's Access Business Group.

SCOTT MOLLEMA
GROUP LEADER, BSE

Scott Mollema is a Senior Scientist with vast experience involving eCoupled™ technology and a thorough understanding of its technical attributes.

With over 12 years experience with eCoupled technology, beginning with the successful integration of the technology into Amway's award-winning eSpring™ Water Purifier and, more recently, with the advancement of the capabilities of the technology, Mr. Mollema is uniquely qualified to be the technical lead assisting with the development of solutions for commercialization of eCoupled technology in collaboration with Fulton Innovation's partner companies.

Mr. Mollema is the recipient of numerous Excellence Awards for his work and currently owns 14 published patents related to wireless power transfer.
